

Challenger Infotainment Warrant - Highlighted Vehicle Excerpts

Search Warrant No. 3214771

Purpose: local, livestream-ready excerpt highlighting the Challenger-related portions of the public redacted warrant. This is a recreated excerpt, not a facsimile of the court PDF. Personal-address material is intentionally omitted. Use the original linked warrant for complete context.

Original public source: https://triggersmart.github.io/redacted-charlie-kirk-warrants/burkhart-warrants-redacted/3214771_Challenger-infotainment-T455CE_REDACTED.pdf

Vehicle identification

The affidavit describes: **“A 2013 Dodge Challenger with a Utah License Plate T455CE. VIN: 2C3CDYAG0DH675106.”**

The requested search again includes the vehicle and its **Infotainment/Telematic Systems and related digital storage media.**

Vehicle timeline stated in the later warrant

The affidavit states that Agent Mortensen confirmed Robinson co-owned a 2013 Dodge Challenger bearing Utah plate **T455CE**.

It states that UVU security video showed the Challenger entering the parking structure at approximately **08:28**, the driver returning at approximately **09:24**, and the vehicle leaving at approximately **09:32** traveling northeast.

Infotainment / telematics categories described by the affiant

The warrant says infotainment/telematics systems can contain hands-free cellular support, vehicle navigation including **trackpoints/track logs, locations and routes**, radio/media streaming functions, **Bluetooth**, internet connectivity, and event logs such as vehicle lighting, odometer reading, gear shifts and door operation.

It states that certain systems can be imaged for analysis of **location**, cellular activity including **calls and text messaging**, and other information useful to reconstruction.

The affidavit also lists imported/associated data such as mobile-device identifiers, phone numbers, account details, contact lists, call logs, text messages, e-mails, pictures, videos, web history, addresses and **GPS coordinates / historical navigation information.**

Historical and deleted data

The affidavit states that travel information could identify departure locations, destinations and how long a vehicle/person remained at coordinates.

It states that even after a previously connected mobile device is removed, **historical live and deleted data may remain** in the infotainment system.

It further states that recovered infotainment data could be used to **refute or corroborate data recovered from other mobile devices or obtained from service providers.**

Relationship to the earlier warrant

The affidavit says: a previous search warrant was approved under No. **3213501**, and the current warrant was submitted for **“clarifying and relevancy purposes.”**

The later return says to refer to the return of service for Search Warrant No. 3213501.
